EXPERIENCE

Senior Software Engineer

Apr '24 — Present

Leet Pros

Remote

- Working remotely for a US-based company.
- Proficient in utilizing Figma designs to develop fully functional Next.js 14 applications, effectively translating design concepts into high-quality, responsive web experiences.

Senior Software Engineer

Dec '23 — Apr '24

Devaxon

Faisalabad, Pakistan

- Develop a Lambda-based PDF converter using container images.
- Deploy the converter as a Docker image on Amazon ECS for scalability.
- Collaborate closely with the product owner for feedback and refinement.
- Ensure a seamless end-to-end workflow from development to AWS ECS deployment.

Software Engineer

May '23 — Nov '23

Sarmaaya.pk

Islamabad, Pakistan (Remote)

- Leveraged SSG, SSR, and ISR techniques using Next.js to significantly enhance website speed, achieving a substantial reduction in build size and improved first paint times.
- Partnered closely with product owners, ensuring alignment of development with business objectives.
- Engineered a Node.js backend from the ground up, incorporating robust security measures, and modeled PostgreSQL databases using Sequelize ORM, ensuring data integrity.
- Successfully containerized the Node.js application using Docker and docker-compose for versatile environments, and executed ETL processes in Apache Nifi for stock data management.

Software Engineer

Jul '21 — Feb '23

EcomCircles

Faisalabad, Pakistan

- Spearheaded the creation of a two-step order fulfillment system specifically tailored for Amazon and Walmart drop shippers. This system significantly enhances order management within warehouses and improves tracking of deliveries, ensuring a more streamlined and efficient operation.
- Played a crucial role in the architectural design and development of a Node.js application, coupled with the strategic modeling of a robust database using MySQL and Sequelize.js. This foundation ensured a stable and scalable platform for the application's operations.
- Successfully integrated essential e-commerce tools, including Intercom and Stamps, into the application. The integration of Intercom aids the customer support department in identifying potential customers, while Stamps provides a solution for calculating estimated delivery charges and generating shipping labels, enhancing the overall efficiency of the e-commerce process.
- Demonstrated strong leadership by supervising and mentoring team members, fostering both their work and professional development. Additionally, ensured high-quality standards in the application by configuring and setting up Jest and SuperTest for API testing, which guarantees the reliability and performance of the application.

PROJECTS

Admin Dashboard in Next.js

- NextAuth provides robust user authentication, ensuring secure data handling and enhancing platform trustworthiness.
- The application ensures a smooth user experience through well-designed navigation, effective middleware, and server actions.
- Integration of Vercel and PostgreSQL ensures scalable data management, while Zod and state management via search parameters enable dynamic content and real-time functionality.

SKILLS

Programming Languages JavaScript, Typescript

Frameworks and Libraries React.js, Node.js, React-Redux, Next.js, Tailwindcss

Database Technologies MySQL, PostgreSQL, Redis

Development Practices Unit test, TDD, RESTful APIs (Swagger), Authentication(OAuth 2, JWT), Authorization(RBAC)

DevOps Tools Docker, Lambda, S3, EC2, ECS

AWARDS

Perfect Attendance

Qbatch

Dec '01

Recognized for consistent presence and accessibility while addressing client requirements.

The High Flyer

Dec '01

Qbatch

Awarded for outstanding performance and unwavering dedication to the project, showcasing substantial advancements and progress.

EDUCATION

Bachelor in Computer Science, National University of Computer and Emerging Sciences

Jul '17 — Jul '21
